After six years, British military operations in Iraq have ended and the last troops are now packing up and leaving Basra. 179 servicemen and women will not be returning home though, having lost their lives whilst serving with the British Armed Forces.

This is a powerful and timely documentary in which friends and family of some of those who died during the conflict explore the deeply personal and lasting legacy Iraq has for them.

The invasion of Iraq has always been controversial but this film provides a voice for some of the people who have been most significantly affected by the decisions that took us to war. From how the withdrawal affects them and their hopes for Iraq and its people to whether they feel blame, anger or pride - for those who are still coming to terms with their loss, their thoughts on Iraq are powerful, varied and sometimes surprising.

The film also tells the story of Lance Corporal John 'Frenchie' Le Galloudec, a soldier who suffered severe spinal injuries after being shot whilst on operations in Basra. His friend and fellow soldier Corporal Rodney Wilson was fatally wounded trying to drag Frenchie to safety. For Frenchie the legacy of Iraq is both physical and mental scars.

Twelve years after it took off, Airport's flamboyant Aeroflot supervisor Jeremy Spake and the other resident Heathrow characters reflect on the heady mix of semi-celebrity, near catastrophe and bags of confusion that created a TV sensation which changed their lives.

MON 20:00 The Way We Travelled (b0074t9g)

First in a three-part series of documentaries on how holiday and travel programmes have changed the British public's attitude to other countries and cultures over the years. Travel in time from the heady glamour of Britain's first terminal at Croydon to the signs and squiggles that direct pilots, as well as passengers, in today's airports. This series reveals how rivalry, skulduggery and sheer passion for flight gave birth to our airports, turning muddy airfields into the 24-hour mini-cities we know today. In the process, they've transformed Britain - giving us the freedom to travel anywhere we want and inspiring fear about our borders.

Rare archive, access to airports' hidden corners and contributors ranging from philosopher and author Alain de Botton to the man charged with scaring birds off Manchester's runways, reveal all.

MON 22:00 Goodbye London Aerodrome (b0017q59)

A dangerous journey soon becomes a seemingly impossible challenge made all the more remarkable by the fact that the teenagers are blind.

Believed by many Tibetans to be possessed by demons, the children are shunned by their parents, scorned by their villages and rejected by society. Rescued by Sabriye Tenberken, a blind educator and adventurer who established the first school for the blind in Lhasa, the students invite the famous blind mountain climber Erik Weihenmayer to visit their school after learning about his conquest of Everest.

Erik arrives in Lhasa and inspires Sabriye and her students Kyila, Sonam Bhuntso, Tashi, Gyenshen, Dachung and Tenzin to let him lead them higher than they have ever been before. The resulting three-week journey is beyond anything any of them could have predicted.

TUE 19:30 Yellowstone (b00jc6p6)
Winter

Series following the fortunes of America's wildlife icons in Yellowstone, the most extensive thermal area on Earth.

In winter, Yellowstone is frozen solid - locked in snow as deep

as a house for over six months. Whether you hunt for meat, live off stored body fat or whether you simply hibernate, you need to take every advantage, however slight, to save precious energy - then you might just make it through the winter to enjoy the green grass and balmy days of spring.

As we follow the grip of winter over the course of six freezing months, we chart the fortunes of Yellowstone's wildlife in a finely balanced fight to survive. Bison use their massively powerful heads to dig through some of the deepest snow in America to reach the grass beneath. A red fox listens out for mice scurrying six feet beneath the snow before diving headfirst into the drift to snap up its prey, while otters slide through Yellowstone's winter wonderland to find any remaining open water where they can fish. All the while, as the herds of elk and bison are gradually weakened by the cold, one animal gets stronger - the wolf.

But all is not as it first seems - there are larger powers at work. Whether a wolf, a bison or an elk makes it through is intimately linked to Yellowstone's greatest secret. Sleeping beneath the ice and snow-covered surface is one of the world's largest volcanoes. In an extraordinary twist of nature, everything from the freezing winter cold to the creation of a snowstorm is determined by the power of Yellowstone's volcanic heart.

Execution of Anne Boleyn

After just three years of marriage to King Henry VIII, Queen Anne Boleyn is under arrest in the Tower of London and about to become the first English Queen in history to be executed. This film reconstructs the harrowing story of Anne's final hours and reveals the circumstances that led to her execution.

When Anne was crowned Queen of England in May 1533, it was a triumphant moment for a woman who had gambled everything on the love of Henry VIII. Yet Henry's infatuation with his clever and outspoken second wife was not to last. From the moment she gave birth to their daughter Elizabeth, and not the son and heir he craved, Anne became vulnerable to the endless political machinations of a ruthless court system, in which political success or failure was the difference between life and death.

Anne fell victim to a swift and devastating coup masterminded by the King's first minister Thomas Cromwell. Within a fortnight of her arrest, Anne, her brother and several of her closest allies at court were convicted of treason and sent to their deaths.

The film tells the story of Anne's final hours, including: Henry's 'merciful' decision not to have Anne burnt at the stake, but to be beheaded with a sword by an executioner from Calais; Anne's declaration of innocence at her last sacrament; and the spies that surrounded her at the Tower and how their information contributed towards her downfall.

It charts the decades when the country made the most of its North Sea windfall, with scarcely a thought about where it came from or of the men and women who brought it to us. Through the story of oil, the series offers a fresh perspective on British politics and society and a timely insight into the state of our economy today.

Forty years ago, Britain was poised on the brink of an extraordinary discovery - oil, billions of gallons of it, deep beneath the harsh waters of the North Sea. There's a tale of dramatic risk-taking and high politics as the government and the oil companies raced to get their hands on the bonanza. The promise of enormous riches inspired technical innovation on a scale never seen before, but did the haste of the North Sea project put at risk the lives of men who were working in some of the most extreme conditions in the world?
