**SAT 19:00 Art Deco Icons (b00ntrs5)**  
The Orient Express

David Heathcote boards the Orient Express at London's Victoria Station and heads off for Venice, first settling into his perfectly restored sleeping cabin and then exploring the decadent charm and the extraordinary history of the train.

He meets James Sherwood, the man who bought the Orient Express in the 1970s and who decided to restore the old 1930s carriages to their Art Deco glamour. At first, his wife Shirley 'thought he was mad', but she became charmed by the challenge of restoring the Decorative art of a romantic train.

After enjoying the luxury of the dining compartment, Heathcote retires to his cabin and wakes up as the train chugs through the Alps. He is joined by Bevis Hillier, the expert who coined the phrase Art Deco and who describes the remarkable spread of the movement across the world from its origins at an exhibition in France in 1925.

However, it is not all luxury - the train has no air conditioning and the washing facilities are a bit basic. So, at the end of 32 exhilarating hours immersed in Art Deco, Heathcote steps off the train at Venice and heads for a beer and a shower.

**SUN 19:00 A History of Christianity (b00ntrs7)**  
Catholicism: The Unpredictable Rise of Rome

Professor Diarmaid MacCulloch's grandfather was a devout pillar of the local Anglican church and felt that any dabbling in Catholicism was liable to pollute the English way of life. But now his grandfather isn't around to stop him exploring the extraordinary and unpredictable rise of the Roman Catholic church.

Over one billion Christians look to Rome, more than half of all Christians on the planet. But how did a small Jewish sect from the backwoods of 1st-century Palestine, which preached humility and the virtue of poverty, become the established religion of western Europe - wealthy, powerful and expecting unflinching obedience from the faithful?

Amongst the surprising revelations, MacCulloch tells how confession was invented by monks on a remote island off the coast of Ireland, and how the Crusades gave Britain the university system.

Above all, it is a story of what can be achieved when you have friends in high places.

**SUN 20:00 Lightning: Nature Strikes Back (b0074qv2)**

Documentary looking into the cause, effect and current understanding of one of nature's greatest enigmas - lightning, which is almost as old as the planet itself and will probably outlast life on Earth.

The film celebrates this maverick of nature's power and beauty, whilst exploring how man is still battling to understand it. It looks at all aspects, from its generation within storm clouds to its impact, both good and bad, on humankind.

It features first-hand accounts from survivors of lightning strikes; shows how medical research is looking into its possible effect on the human body's own electrical circuit; looks at its role as a life giver, fixing nitrogen and possibly even providing the spark of life itself; reveals the application of state-of-the-art lightning detection techniques; and shows the impact that human activity itself may have on the formation of lightning.

From triggered lightning studies in Florida and the defences at Kennedy Space Center to filming sprites in Colorado, the film discovers whether science is any closer to unlocking some of lightning's mysteries.

**SUN 21:00 The Horizon Guide to Mars (b00p1crx)**

The intriguing possibility of life on Mars has fuelled man's quest to visit the Red Planet. Drawing on 45 years of Horizon archive, space expert Dr Kevin Fong presents a documentary on Earth's near neighbour.

Man's extraordinary attempts to reach Mars have pushed technological boundaries past their limit and raised the tantalising prospect of establishing human colonies beyond our own planet.

While the moon lies 240,000 miles away, Mars is at a distance of 50 million miles. Reaching the moon takes three days, but to land on Mars would take nearly eight months, and only two thirds of the missions to Mars have made it. The BBC has been analysing the highs and lows throughout - including the ill-fated British attempt, the Beagle.

Horizon has explored how scientists believe the only way to truly understand Mars is to send people there. If and when we do, it will be the most challenging trip humanity has ever undertaken.

**SUN 22:00 To Mars by A-Bomb (b0074p0z)**

Documentary telling the amazing true story of a top secret US government-backed attempt to build a spaceship the size of an ocean liner and send it to Mars, Jupiter and Saturn, propelled by thousands of miniature nuclear

bombs. Awesome, fantastic and possibly crazy, Project Orion employed some of the best scientists in the world, including the brilliant British mathematician and physicist Freeman Dyson.

**SUN 23:00 The Sky at Night (b00p1crz)**

**MON 20:00 The Thirties in Colour (b00cp456)**  
Wright Around the World

Four-part series using rare, private and commercial film and photographic archives to give poignant and surprising insights into the 1930s, a decade which erupted into colour as polychromatic photographic technology came of age and three important processes - Dufaycolour, Technicolor and Kodachrome - were brought to the market.

Together with his younger brother Bolling, the American industrialist Harry Wright was wealthy enough to indulge his twin passions for travel and filmmaking. Both siblings collected and shot films that captured the world at a pivotal time in history.

They captured astonishing images acquired and filmed in the islands of the South Pacific, Papua New Guinea and Indonesia, as well as South Africa, Morocco, Palestine, and several countries in Europe, including Britain. These destinations were visited during the golden age of ocean travel, when the well-off could escape the Great Depression and travel the world on luxury cruise ships.

The sea had become a playground but it would soon become a battleground, as the world lurched towards the bloodiest war in history.

**MON 21:00 Enid (b00nrxk8)**

Illuminating and surprising drama telling the story of arguably the most popular children's storyteller of all, Enid Blyton.

It reveals how Blyton became the writer who would capture more youthful imaginations than anyone else, following her career from ambitious, driven and as yet unpublished young woman to household name and moral guardian, while glimpsing her own childhood - a dark time, far from the carefree, happy idyll portrayed in her books.

Through marriages and children, the roles of Enid the wife (to Hugh and then Kenneth) and mother are portrayed, ones she struggled to fulfil while balancing them with her extraordinary output.

The film also uncovers a strong and resourceful woman; a woman who never really grew up; a woman who rewrote the endings of many chapters of her real life, sometimes with cruel and hurtful results; and a woman whose legacy has often been criticised but whose success cannot be argued with, who gave children the stories they wanted.

**TUE 00:35 Classic Albums (b00nts6z)**

Duran Duran: Rio

In 1981, Duran Duran leapt into the limelight with two hit singles and their first album, but it was the follow-up, Rio, which catapulted the band to global success.

Against a backdrop of Thatcher's Britain, with riots, record unemployment and the Falklands conflict, Duran Duran released this optimistic, celebratory and uniquely visual album. Rio would go on to become one of the most successful albums of the 1980s and paved the way for Duran Duran to become one of the world's biggest bands.

The programme tells the story behind the writing, recording and subsequent success of Rio through interviews, musical demonstrations and archive footage. Original band members Simon Le Bon, Nick Rhodes, John Taylor and Roger Taylor are interviewed along with director Russell Mulcahy, former manager Paul Berrow, journalist Beverley Glick, designer Anthony Price and Bob Geldof amongst others.

Rio captures Duran Duran at the height of their powers, with wall-to-wall hits and great videos.

**TUE 01:25 Wild Boys: The Story of Duran Duran (b007bqdj)**

Duran Duran came out of Birmingham and conquered the world during the 1980s. Originally a New Romantic band in full make-up and cossack pants, they rapidly became bedroom pin-ups for a generation of teenage girls.

Led by Simon Le Bon, Nick Rhodes and John Taylor, Duran Duran dominated the British and American charts in the mid-1980s with classic singles such as Rio, Save a Prayer and Wild Boys. Pioneers of the MTV-style promo video - from the X-rated Girls on Film to Raiders of the Lost Ark spoof Hungry Like the Wolf - Duran Duran were the 80s equivalent of The Beatles in America and outsold Spandau Ballet and Wham! in their pomp.

Sixty million records later, Le Bon and Rhodes are seen touring America with their Pop Trash project from the early 2000s. The documentary reflects on the heady heights of Duran Duran's career, the cracks in their make-up plus the effects of sex, drugs and fame on ordinary boys from working-class backgrounds.

Apart from the key Durannies - Le Bon, Rhodes and John Taylor - the programme also features celebrity interviews with Debbie Harry, Yasmin Le Bon, Duran Duran managers Paul and Michael Berrow, Claudia Schiffer, Nile Rodgers and Lou Reed.

Following a period in which discussions about prices of art have dominated, this is a film about art itself rather than the market or the celebrities it created. Gus journeys from whitewashed studios to squats to explore what British artists are making, where they are making it and how things have changed.

Meeting a spectrum of those who call themselves artists, from Turner Prize-winner Grayson Perry to those just out of college, Gus asks whether a new era in art is dawning and whether there is a reason to be optimistic.

Both were built at the same time as the farmhouse - around 1820 - and both will be turned into accommodation.

The miller's cottage was used in later years as a cattle shed and is now little more than a derelict ruin. **THU 20:00 Nicholas Crane's Britannia: The Great Elizabethan Journey (b00gntqg)**  
A Journey Through England and Wales

When William Camden's Britannia was printed in 1586, it staggered its Elizabethan readers. Nothing like it had been seen before. For the first time, the entire British Isles had been described in astonishing detail: the mountains and rivers, the history and customs, the climate and the people of each and every county. Britannia was an encyclopaedic tour of the whole country in a single book.

In this three-part series, Nicholas Crane rediscovers this 'lost' masterpiece as, on an epic 5000-mile hike, he battles the elements in search of Elizabethan Britain. He looks at England and Wales first.

**THU 21:00 A History of Christianity (b00nxmnn)**

What story is this ancient drama trying to tell us?

In the third part of his journey into the history of Christianity, Professor Diarmaid MacCulloch charts Orthodoxy's extraordinary fight for survival. After its glory days in the eastern Roman Empire, it stood right in the path of Muslim expansion, suffered betrayal by crusading Catholics, was seized by the Russian tsars and faced near-extinction under Soviet communism.

MacCulloch visits the greatest collection of early icons in the Sinai desert, a surviving relic of the iconoclastic crisis in Istanbul and Ivan the Terrible's cathedral in Moscow to discover the secret of Orthodoxy's endurance.
