

SATURDAY 16 OCTOBER 2010

SAT 19:00 Life (b00nj6dr)
Reptiles and Amphibians

Reptiles and amphibians look like hang-overs from the past. But they overcome their shortcomings through amazing innovation.

The pebble toad turns into a rubber ball to roll and bounce from its enemies. Extreme slow-motion shows how a Jesus Christ lizard runs on water, and how a chameleon fires an extendible tongue at its prey with unflinching accuracy. The camera dives with a Niuean sea snake, which must breed on land but avoids predators by swimming to an air bubble at the end of an underwater tunnel. In a TV first, komodo dragons hunt a huge water-buffalo, biting it to inject venom, then waiting for weeks until it dies. Ten dragons strip the carcass to the bone in four hours.

SAT 20:00 Michael Wood's Story of England (b00v9kb5)
Peasants' Revolt to Tudors

Groundbreaking series in which Michael Wood tells the story of one place throughout the whole of English history. The village is Kibworth in Leicestershire in the heart of England - a place that lived through the Black Death, the Civil War and the Industrial Revolution and was even bombed in World War Two.

Wood's gripping tale moves on to dramatic battles of conscience in the time of the Hundred Years' War. Amazing finds in the school archive help trace peasant education back to the 14th century and we see how the people themselves set up the first school for their children.

Some villagers join in a rebellion against King Henry V, while others rise to become middle class merchants in the textile town of Coventry. On the horizon is the Protestant Reformation, but the rise of capitalism and individualism sow the seeds of England's future greatness.

SAT 23:15 Crooked House (b00gf5sy)
The Knocker

When schoolteacher Ben unearths an old door knocker in the garden of his new home, the curator suggests it may come from the now-demolished house, reputed to be haunted. Ben prompts the curator to tell him two stories about the house's past.

Back in the present day, commitment-shy Ben begins to discover that, though demolished, Geap Manor casts a long shadow. Having recently left his girlfriend Hannah for a life of excitement over cosy domesticity, he is excited by the curator's stories and screws the ancient door knocker to his new front door. However, he soon finds himself getting more excitement than he bargained for as the past begins to intrude rudely with a loud knock at the door in the night and a terrifying journey into Geap Manor's bloody past.

SAT 23:45 Jane Goodall: Beauty and the Beasts (b00v9j22)
In 1960, a young secretary from Bournemouth, with no scientific qualifications, entered a remote forest in Africa and achieved something nobody else had ever done before. Jane Goodall became accepted by a group of wild chimpanzees, making discoveries that transformed our understanding of them, and challenged the way we define ourselves as human beings by showing just how close we are as a species to our nearest living relatives.

Since then, both she and the chimps of Gombe in Tanzania have become world famous - Jane as the beauty of many wildlife films, they as the beasts with something profound to tell us. As one of the programme's contributors, David Attenborough,

suggests, Jane Goodall's story could be a fable if it wasn't true.

In this revealing programme filmed with Jane Goodall in Africa, we discover the person behind the myth, what motivates her and the personal cost her life's work has exacted from her - and why she still thinks we have a lot to learn from the chimps she has devoted her life to understanding.

SAT 00:45 Gorillas Revisited with Sir David Attenborough (b0074sfp)

David Attenborough recounts his very personal experiences with the mountain gorillas of Rwanda. Ever since they were discovered over a century ago, these remarkable creatures have been threatened by loss of habitat, poaching, disease and political instability. But despite all odds their numbers have increased. David tells the extraordinary tale of how conservationists like Dian Fossey have battled to save the mountain gorilla from the brink of extinction.

SAT 01:45 Chopin: The Women Behind the Music (b00v9qpb)

Documentary about the life of the great pianist and composer Chopin and the story of the women whose voices inspired his music. It is undeniable that Chopin revolutionised the nature of music composed for the piano both technically and emotionally. What is less well known is that the actual musical instrument that provided his greatest source of inspiration was the female voice.

To mark the 200th anniversary of Chopin's birth, this film follows young pianist James Rhodes on a journey to Warsaw, Paris and London to discover the real women who had such a powerful influence on the composer.

Exploring the events of Chopin's life, Rhodes encounters the singers who enchanted the composer with their voices: Konstancja, a young soprano and the object of his teenage affections; Delfina, the sexually notorious Polish Parisian emigre countess; fellow composer and opera singer Pauline Viardot; and, during the final few months of his life, the Swedish operatic superstar Jenny Lind.

Threaded through the narrative of the film is a selection of Chopin's piano music performed by Rhodes, while rising young opera singer Natalya Romaniv performs some of the signature arias that thrilled Chopin.

Featuring contributions from Chopin experts including the interpreters Emanuel Ax and Garrick Ohlsson, his biographer Adam Zamoyski and piano guru Jeremy Siepmann.

SAT 03:15 Explosions: How We Shook the World (b00v9kb3)

Engineer Jim Stansfield is used to creating explosions, but in this programme he uncovers the story of how we have learnt to control them and harness their power for our own means.

From recreating a rather dramatic ancient Chinese alchemy accident to splitting an atom in his own home-built replica of a 1930s piece of equipment, Jim reveals how explosives work and how we have used their power throughout history. He goes underground to show how gunpowder was used in the mines of Cornwall, recreates the first test of gun cotton in a quarry with dramatic results and visits a modern high explosives factory with a noble history.

Ground-breaking high speed photography makes for some startling revelations at every step of the way.

SUN 19:30 The Beauty of Maps (b00s64f4)
Atlas Maps - Thinking Big

Documentary series charting the visual appeal and historical meaning of maps.

The Dutch Golden Age saw map-making reach a fever pitch of creative and commercial ambition. This was the era of the first ever atlases - elaborate, lavish and beautiful. This was the great

age of discovery and marked an unprecedented opportunity for mapmakers, who sought to record and categorise the newly acquired knowledge of the world. Rising above the many mapmakers in this period was Gerard Mercator, inventor of the Mercator projection, who changed mapmaking forever when he published his collection of world maps in 1598 and coined the term 'atlas'.

The programme looks at some of the largest and most elaborate maps ever produced, from the vast maps on the floor of the Royal Palace in Amsterdam, to the 24-volume atlas covering just the Netherlands, to the largest atlas in the world, The Klencke Atlas. It was made for Charles II to mark his restoration in 1660. But whilst being one of the British Library's most important items, it is also one of its most fragile, so hardly ever opened. This is a unique opportunity to see inside this enormous and lavish work, and see the world through the eyes of a king.

These mainly British pictures were dominated by the legendary Hammer Films, who rewrote the horror rulebook with a revolutionary infusion of sex and full-colour gore - all shot in the English Home Counties.

Mark meets key Hammer figures to find out why their Frankenstein and Dracula films conquered the world, making international stars of Christopher Lee and Peter Cushing. He looks at the new boom of horror that followed in Hammer's wake, including the ravishing Italian movie Black Sunday, and talks to the influential American producer Roger Corman about his disturbing and dreamlike Edgar Allan Poe films. He also explores the intriguing cycle of British 'folk horror' films, such as The Wicker Man and Mark's personal favourite, Blood on Satan's Claw.
