Elsa: The Lioness that Changed the World

In the 1960s, Born Free captured the world's imagination with the story of Elsa, an orphaned lioness who was taken in by George and Joy Adamson and returned to a life in the wild. The book and film sparked a new love of nature that has blossomed ever since, but the true story of what happened afterwards was far more tragic as both George and Joy were murdered.

Fifty years on, this emotional and revealing drama documentary relives those events - with intimate contributions from Virginia McKenna and David Attenborough.

**SAT 20:00 10 Things You Didn't Know About... (b008pr87)**  
Tsunamis

Iain Stewart journeys across the oceans to explore the most powerful giant waves in history, with ten remarkable stories about tsunamis.

These massive waves can be taller than the biggest skyscraper, travel at the speed of a jet plane and when they reach land, rear up and turn into a terrifying wall of water that destroys everything in its path. These unstoppable, uncontrollable forces of nature caused the ruin of an entire ancient civilization, may have played a small part in the demise of the dinosaurs, and in World War II were used as a weapon. Yet astonishingly, two men who surfed the tallest wave in history - half a kilometre high - survived.

When a flower collector goes looking for a rare orchid and is then reported missing, the two crimes appear unconnected.

Dear Censor

Lifting the lid on the world of cinema censorship, this programme has unique access to the files of the British Board of Film Classification. Featuring explicit and detailed exchanges between the censor and film-makers, 'Dear Censor' casts a wry eye over some of the most infamous cases in the history of the board.

From the now seemingly innocuous Rebel Without a Cause, the first 'naturist' films and the infamous works of Ken Russell, and up to Rambo III, this frank and surprisingly warm documentary demonstrates how a body created by the industry to safeguard standards and reflect shifts in public opinion has also worked unexpectedly closely with the film-makers themselves to ensure that their work was able reach an audience.

Arctic

Two hundred years ago, the Arctic was largely a great blank on the map for would-be explorers. It captured their imagination as a place of sublime beauty and yet also as a desolate frozen landscape, home to the deadly polar bear. It was a place where heroes attempted to find the North-West passage and where whole expeditions disappeared without trace.

In the last century, the polar sea has become a region of vital strategic significance where the great powers built secret bases, transforming the lifestyle of the Inuit. Now, as the Arctic ice melts, the polar bear has become an emblem for the fragility of our planet.

**SUN 01:25 Top of the Pops (b00zwrn7)**  
The Story of 1976

The nation grew up with Top of the Pops and it was always a talking point, but 35 years ago a particular kind of Top of the Pops programme and tone held sway. This documentary explores Top of the Pops in 1976 - as a barometer of the state of pop and light entertainment TV.

It celebrates the power of the programme and observes British society of the mid 70s, British TV and the British pop scene. In 1976, glam was over and nothing had replaced it - the charts belonged to Showaddywaddy, Brotherhood of Man and the Wurzels, all to be found on Top of the Pops hosted by the Radio 1 DJs. If you wanted rock you looked to the Old Grey Whistle Test, while outside the charts a new scene was rumbling.

Contributors include Tony Blackburn, David 'Diddy' Hamilton, Paul Morley, Toyah Willcox, Showaddywaddy, Brotherhood of Man, the Wurzels and Dave Haslam.

But this vast desert centre was originally seen as a place of death and silence by the first white explorers. **MON 21:00 Growing Children (b01lyczl)**  
Autism

Autism is a complicated and often misunderstood condition. In this film, child psychologist Laverne Antrobus goes on a quest to discover the different way that the brain works in children with autism and to explore the latest scientific research.

Laverne meets Tony, a severely autistic teenager who requires full-time care from his family, and learns some of the difficult sensory problems that children with autism can have. The autistic brain cannot always process light and sound in the correct way, leading to an overwhelming and exhausting overload of noise and colour. Laverne travels to the University

of Cardiff to investigate new research into the link between sensory issues and the autistic brain. She also goes to the University of Nottingham to try and uncover why people like Tony appear to be so socially isolated. She begins to learn the amazing way our brains work when confronted with social situations and how we understand the social cues that we encounter every day - and what happens when this goes wrong.

With a better understanding of Tony's difficulties, Laverne then continues to follow his story as this family go through the difficult and highly emotional transition of putting their son into full-time residential care.

Laverne also meets a family with two young boys, Jake and Zaine. Jake has been diagnosed with high functioning autism - the opposite end of the spectrum to Tony. By spending time with Jake, Laverne sees some of the social difficulties associated with the condition, such as the daily struggle with school and making friends. Jake's younger brother Zaine is also beginning to show autistic traits and in a particularly poignant sequence Laverne attends a diagnosis session with the family. With amazing access to this emotional day, Laverne explores the complicated process of diagnosis and the symptoms that are looked for in order to reach the correct conclusion. Laverne also investigates some exciting and pioneering research being carried out at Birkbeck BabyLab, which is offering hope for a simpler and earlier diagnostic procedure.

Michael is a 19-year-old with high functioning autism who is studying physics at the University of Surrey. By meeting Michael we see that an autistic brain can actually learn to deal with mainstream society. How does he comprehend society and what coping systems does he have in place? Laverne carries out a experiment where she takes Michael to view one of her favourite paintings. The different way in which they view the portrait offers a powerful insight into the way someone on the spectrum can think and interact. Laverne also compares how someone with autism deals with idioms and metaphors to those who are not on the spectrum. We come to understand that someone with autism just sees the world in a very different way.

These powerful stories are intermingled with interviews with leading scientists in the field that help to further illuminate this condition.

Our brains are constantly monitoring the social situations we find ourselves in - attempting to mindread the people around us and helping us to respond appropriately. For those on the autistic spectrum this is often not the case. Autism is still an incredibly puzzling disorder of the brain, but over the last 50 years we have started to unlock the meaning of some of its more bizarre behaviours and symptoms. We are now beginning to understand what happens in the brain as we process all the sensory information from the world around us, and to comprehend how it affects the way children think, act and grow into social beings. In this film we learn along with Laverne and we begin to understand the different way in which the brain of someone on the autistic spectrum operates - as well as the heart-wrenching effect this can have on them and their families.

**MON 23:20 A Century of Fatherhood (b00sv2ry)**  
The Good Father

Series which tells the story of the revolution in modern fatherhood in Britain during the last hundred years. Using intimate testimony, rare archive footage and the latest historical research it reveals the important, and often misunderstood, role played by fathers.

The opening part explodes the popular myth of the tyrannical Victorian-style father, whose children were seen and not heard. The majority of men did not harshly punish their children: they were good and devoted dads who took their job as provider and protector of their family seriously.

Those who tragically lost their lives in the First World War are still fondly remembered by sons and daughters today. Some dads even took part in the fathercraft movement that began in 1920 and which encouraged dads to change nappies and to form close relationships with their children from the beginning.

It is estimated that 99 per cent of species have become extinct, and there have been times when life's hold on earth has been so precarious it has seemed to hang on by a thread.

This series focuses on the survivors, the old-timers whose biographies stretch back millions of years, and who show how it is possible to survive a mass extinction event which wipes out nearly all of their neighbours. The Natural History Museum's Professor Richard Fortey discovers what allows the very few to carry on going - perhaps not forever, but certainly far beyond the life expectancy of normal species. What makes a survivor when all around drop like flies?

In the opening episode, Professor Fortey focuses on 'the great dying' - a series of cataclysms over a million-year period 250 million years ago.

**TUE 23:00 Lost Cities of the Ancients (b00792v2)**  
The Cursed Valley of the Pyramids

In the Lambeyeque valley in northern Peru lies a strange lost world - the forgotten ruins of 250 mysterious pyramids, including some of the biggest on the planet, colossal structures made out of mud bricks. Long ago, the Lambeyeque people were haunted by a terrible fear and believed that building pyramids was essential to their survival. Their obsession reached its height at a city called Tucume, an eerie place of 26 pyramids standing side by side, the last pyramids this

civilisation created before they vanished forever.

What was the fear that drove these people to build so many pyramids, what were they for and why did the whole civilisation suddenly vanish? This film captures the moments when archaeologists at the site uncovered a mass of bodies of human sacrifice victims, following a trail of clues into the dark story of Tucume. It recreates the strange rituals of the people of the valley, revealing a civilisation whose obsession to build pyramids eventually turned to horror, until Tucume finally vanished in a bloody frenzy of human sacrifice.

**WED 20:00 Ian Hislop's Scouting for Boys (b007hfx3)**  
Robert Baden-Powell's handbook Scouting for Boys, written in 1908, may be largely forgotten today, but it is one of the most influential and best-selling books of all time. In the 20th century, only the Bible, the Koran and the Thoughts of Chairman Mao sold more. But they had fewer jokes, no pictures and were useless at important stuff like tying knots.

In this entertaining and affectionate film, Ian Hislop uncovers the story behind the book which kick-started the Scout Movement - a work which is very eccentric, very Edwardian and very British.

Ian discovers that the book is actually very radical and addresses all sorts of issues that we think of as modern, such as citizenship, disaffected youth and social responsibility. He explores the maverick brilliance of Baden-Powell, a national celebrity after his heroism in the Boer War, and considers the book's candid focus on health and wellbeing - from the importance of what Baden-Powell called a 'daily rear' to his infamous warning on the dangers of masturbation.

Contributors include his grandson Lord Baden-Powell, minister for culture and former cub scout David Lammy, biographer Tim Jeal and Elleke Boehmer, editor of the re-issue of the original Scouting for Boys.

Samuel Willenberg and Kalman Taigman were slave labourers who escaped in a dramatic revolt in August 1943. One would seek vengeance in the 1944 Warsaw Uprising, while the other would appear in the sensational trial of Adolf Eichmann in 1961. **FRI 20:50 The Joy of Easy Listening (b01lg614)**  
In-depth documentary investigation into the story of a popular music genre that is often said to be made to be heard but not listened to. The film looks at easy listening's architects and practitioners, its dangers and delights, and the mark it has left on modern life.

From its emergence in the 50s to its heyday in the 60s, through its survival in the 70s and 80s and its revival in the 90s and beyond, the film traces the hidden history of a music that has reflected society every bit as much as pop and rock - just in a more relaxed way.

Invented at the dawn of rock 'n' roll, easy listening has

shadowed pop music and the emerging teenage market since the mid-50s. It is a genre that equally soundtracks our modern age, but perhaps for a rather more 'mature' generation and therefore with its own distinct purpose and aesthetic.

Contributors include Richard Carpenter, Herb Alpert, Richard Clayderman, Engelbert Humperdinck, Jimmy Webb, Mike Flowers, James Last and others.
