<p>SATURDAY 28 OCTOBER 2023</p> <p>SAT 00:00 BBC News (w172z2r2jdv9sy7) The latest five minute news bulletin from BBC World Service.</p> <p>SAT 00:06 The Real Story (w3ct4q7d) Argentina at a crossroads</p> <p>Argentina's economy minister has won more than 36% of the vote in Sunday's presidential elections, defying expectations. The election has been shaken by the emergence of anti-establishment populist and self-styled "libertarian" Javier Milei. Mr Milei is an outspoken right-wing economist whose "shock-jock" style and aggressive social media campaigning have appealed to younger voters. No candidate received the necessary 45% of votes needed to win outright, so there will be a second round on 19 November. The election comes amid a severe economic crisis - inflation is nearing 140% - 40% are living below the poverty line. Argentina is one of Latin America's most stable democracies - but it remains the world's single biggest debtor to the International Monetary Fund (IMF), owing \$46bn (£38bn). Three-quarters of young Argentinians want to leave the country to look for better opportunities. What needs to happen to improve the country's prospects? And will the economic mess damage Argentina's democracy?</p> <p>Shaun Ley is joined by:</p> <p>Natalie Alcoba, an Argentinean-Canadian journalist Ignacio Labaqui, senior analyst with Medley Global Advisors, which offers advice to clients on political risk Christopher Sabatini, he's Senior Research Fellow for Latin America, US and the Americas Programme at the Chatham House thinktank</p> <p>Also featuring: Marcela Pagano a newly elected member of the Argentine Congress for Javier Milei's La Libertad Avanza Gustavo Martínez Pandiani, Sergio Massa's principal foreign policy advisor and the Ambassador to Switzerland. Pau Bressi, a university student in Buenos Aires</p> <p>Produced by: Max Horberry and Ellen Otzen</p> <p>(Photo: Presidential candidate Javier Milei speaks after first round results, Buenos Aires, Argentina - 23 Oct 2023. Hamas says its fighters have been battling Israeli soldiers in the north and centre of the Gaza Strip as an internet and phone service blackout continues.</p> <p>Also in the programme: Americans have been urged to leave Lebanon because of the security situation in the region; and we speak to the designer who says boring buildings damage our health and happiness.</p> <p>Joining presenter Audrey Brown are Dalal Mawad, a Lebanese journalist based in Paris and Peter Neumann who is Professor of Security Studies at Kings College based in London.</p> <p>(Picture: An Israeli soldier its on a tank during preparation for ground maneuvers at an undisclosed location near the border with Gaza. Credit: Hannibal Hanschke/EPA-EPE/REX/Shutterstock)</p> <p>SAT 09:00 BBC News (w172z2r2jdvbwnd) The latest five minute news bulletin from BBC World Service.</p> <p>SAT 09:06 BBC OS Conversations (w3ct5b2h) Jewish-Palestinian couples</p> <p>Observing the suffering on both sides of the Israel and Gaza war, are couples and families around the world in which individuals with Jewish and Palestinian heritage have come together and built a shared life. For some there will be conflicting and mixed emotions, and some difficult questions.</p> <p>We hear their conversations as they talk about the beginnings of romantic relationships, and the realisation of the huge complications and family disputes that might ensue. Emotions are shared, and the challenges and decisions they face because of the present and also the past.</p> <p>Leya and Thae, a Jewish-Palestinian couple living in the US, describe how both of their families were happy with the match, and how they're bringing their son up to understand and celebrate both sides of his heritage, and to make his own choices.</p> <p>We also speak to two Jewish women who have married Palestinian men. Mya Guarneri, an American-Israeli describes meeting her Palestinian husband-to-be Mohammed. Years later,</p>
Supported by bbc.co.uk/programmes/		

shocked by the events of October 7th, Mya found herself asking Mohammed, “Is this the sort of operation that you support?” And he was like, ‘of course not’. But I had to ask him that question, and I regret it.” Becca met her husband Waseem in Israel, and tells us about the moment she realised the impact this could have on both of their lives. Despite unease on both sides of their family, they married in 2012.

We also hear from a family of four, whose two adult sons now find themselves being asked by friends “whose side are you on?”.

SAT 09:30 BBC News Summary (w172z2rwz4g17xs)
The latest two minute news summary from BBC World Service.

SAT 09:32 Pick of the World (w3ct5b9b)
Kabaddi or squash at the Olympics?

Frisbee, kabaddi or ballroom dancing? What would you add to the list of Olympic sports? Plus, the baseball fan born without arms who's thrown a pitch at every major US stadium. And a new podcast, called Amazing Sport Stories.

SAT 09:50 Over to You (w3ct4rpz)
Listeners's feedback on reports of the Israel-Gaza conflict

As much of the world's attention remains focussed on events in the Middle East, we hear more of your feedback on the BBC World Service's coverage.

Plus, Africa's Urban Future with Mike Wooldridge has been exploring the opportunities and challenges of breakneck development in that continent. We speak to him and hear your comments on the series.

Presenter: Rajan Datar
Producer: Howard Shannon.
A Whistledown production for the BBC World Service

SAT 10:00 BBC News (w172z2r2jdvc0dj)
The latest five minute news bulletin from BBC World Service.

SAT 10:06 Sportshour (w3ct4s9r)
The 5G helmet that could revolutionise American Football for deaf players

Chuck Goldstein tells us how a 5G connected football helmet is helping him communicate with his deaf quarterback in a way which was unthinkable before. Goldstein is head coach of a team of deaf and hard of hearing players at Gallaudet University and he believes the technology could reduce potential injuries and allow deaf players to potentially make a career in the sport.

Ciara McCormack explains her plans to put players at the centre of everything she does following her takeover of Treaty United in Limerick. The former Republic of Ireland defender says the country saved her following the abuse she encountered in Canadian football.

And Neil Jones tells us how winning the National Lottery set him on a path towards captaining England's pool team. One of the first things Jones bought with his winnings was a pool table.

SAT 11:30 BBC News Summary (w172z2rwz4g1hf1)
The latest two minute news summary from BBC World Service.

SAT 11:32 Unspun World with John Simpson (w3ct5hn4)
Will Israel invade Gaza?

Will Israel launch a ground assault in Gaza and, if they do, what is at stake? BBC World Affairs editor John Simpson, gets the latest from Middle East correspondent Tom Bateman. Plus, World Service Middle East editor, Sebastian Usher, examines the position of other Arab countries in the region - is there a chance they will get dragged into the conflict?

Meanwhile the war in Ukraine rages on but, as the winter draws

in, is Ukraine any closer to victory? Vitaly Shevchenko from BBC Monitoring gives his assessment. And Argentina's surprise result in the first round of presidential elections but can either candidate fix the nation's spiralling debt and inflation? Veronica Smink from BBC Mundo joins us from Buenos Aires.

Producer: Pandita Lorenz and Benedick Watt

SAT 12:00 BBC News (w172z2r2jdvc7ws)
The latest five minute news bulletin from BBC World Service.

SAT 12:06 The Forum (w3ct4vc5)
What makes a good boss?

We can probably all think of examples of bad bosses – the people who we love to gossip about with our colleagues outside work. And even if you're lucky enough to have had good experiences of management, you may be familiar with bad bosses from popular culture. But what makes a good manager and how can you inspire people in the workplace?

It's a question that's been debated since the Industrial Revolution when rapidly expanding companies needed a way of controlling their workers. From there developed various theories of management, some of which drew on aspects of sociology and psychology.

Rajan Datar is joined by Ann Francke, the chief executive of the Chartered Management Institute in the UK; Monica Musonda, the CEO of Java Foods in Zambia; and Todd Bridgman, Professor of Management Studies and Head of the School of Management at Victoria University of Wellington / Te Herenga Waka in New Zealand. We'll also present a selection of comments and experiences sent in by Forum listeners.

SAT 13:06 Newshour (w172z09p1r180wb)
Gaza in 'total chaos' says BBC reporter

There has been a blackout of communications in Gaza since Friday night. The Israeli military is intensifying its bombing of Gaza and says its troops and tanks remain on the ground. We hear from our reporter in southern Gaza, a medic who has not heard from colleagues since last night, and an Israeli government spokesperson.

Also on the programme: we go to Taiwan where celebrations for the largest annual Pride event in Asia are in full swing; and we hear about a BBC investigation that has revealed how people-smugglers, selling illegal routes to Europe from Pakistan, are luring potential customers via social media.

The latest five minute news bulletin from BBC World Service.

SAT 19:06 The Inquiry (w3ct4wfj)
What can US diplomacy achieve in the Middle East?

After violence erupted between Hamas and Israel, President Biden flew to Tel Aviv to offer his 'staunch' ally US support.

In a very public embrace of Israel, he reinforced a relationship that goes back decades to Israel's foundation.

But does the US have the diplomatic influence to bring peace to the region?

This week on the Inquiry: what can US diplomacy achieve in the Middle East.

Contributors:

David Sanger, White House and national security correspondent and senior writer for The New York Times
Steven Cook, senior fellow for Middle Eastern Studies at the Council on Foreign Relations
Emma Ashford, senior fellow at the Stimson Center
Brian Katulis, vice president of policy at the Middle East Institute

Presented by Gary O'Donoghue
Produced by Louise Clarke
Researched by Matt Toulson

The latest two minute news summary from BBC World Service.

SAT 19:32 World of Wisdom (w3ct5llm)
Tackling Addiction

Junior is an educated young man from a large city in Nigeria, and he has developed an addiction to online gambling that has taken over his life. Gambling has separated him from so many things that are important to him in life, and his inability to share his situation with those he loves means he has been distanced from them too.

Dr Chetna Kang is a Consultant Psychiatrist and Priestess in the Hindu Tradition of Bhakti Yoga. She shows him a route to reconnect and start to tackle his addiction step by step. Sana Safi Presents.

SAT 20:00 BBC News (w172z2r2jdvd6vt)
The latest five minute news bulletin from BBC World Service.

SAT 20:06 The Arts Hour (w3ct4v1q)
Maysoon Pachachi director of Our River...Our Sky

Nikki Bedi is joined in the studio by Maysoon Pachachi Iraqi-born film director of Our Rive...Our Sky and they discuss the violence in Martin Scorsese's latest film Killers of the Flower Moon. Plus, Hollywood actor Laura Linney on The Miracle Club, and Serbian performance artist Marina Abramovic reflects on her five decades of performance art.

Also, Norwegian director Kristoffer Borgli on his film Sick of Myself, and one of the most important and influential women in Hollywood, NBCUniversal Studio Group's Donna Langley.

Nikki is also joined by critic Hanna Flint.

Presenter: Nikki Bedi
Producer: Oliver Jones

<p>SAT 21:00 BBC News (w172z2r2jdvdbly) The latest five minute news bulletin from BBC World Service.</p> <p>SAT 21:06 Newshour (w172z09p1r18zvc) Netanyahu confirms troops in Gaza</p> <p>Prime Minister Benjamin Netanyahu says Israel's ground operation in Gaza marks the "second stage" of what he says will be a "long and difficult" war with Hamas. Meanwhile, civilians in Gaza remain cut off from the outside world, because phone lines and the internet are down for most people.</p> <p>Also in the programme: We hear about the Iranian teenager who's died after an encounter with the country's so-called morality police; and why Taiwan takes extra pride in pro-gay rights events that clearly mark the island out from China.</p> <p>(Photo: A man searches through the rubble of a destroyed building. Credit: Getty Images)</p> <p>SAT 22:00 BBC News (w172z2r2jdvdgc2) The latest five minute news bulletin from BBC World Service.</p> <p>SAT 22:06 Music Life (w3ct4mgh) Allowing yourself to be possessed with GAIKA</p> <p>Our host this week is artist and musician GAIKA - he was born in London and raised in the city's night clubs. He released his debut mixtape Machine, in 2015 and since released a string of projects including BASIC VOLUME and Seguridad. He has collaborated with some of the most renowned names in contemporary music, including 3D of Massive Attack, Dean Blunt, Kelela, Mike Skinner, Mykki Blanco and SOPHIE. Alongside his music he has also created a number of art installations and has just released his new album Drift.</p> <p>Joining him are a group of artists whose music incorporates hip-hop, dub poetry and experimental pop – plus lots of spaces in between.</p> <p>First is British rapper Speech Debelle, who released her debut album Speech Therapy in 2009, which went on to win the coveted Mercury prize. She released two further albums in 2012 and 2017. In June the self-confessed food lover shared her latest album Sunday Dinner On A Monday.</p> <p>Next up is a singer-songwriter, composer, producer and multi-instrumentalist Lucinda Chua. Based in South London, she primarily uses her voice, a cello, and an array of effects units to create her music, and released her debut album Yian in March.</p> <p>Finally, South London-born poet and musician James Massiah, a wordsmith who has built a reputation for his literary voice. His collaborators include The xx and Massive Attack. He released his Natural Born Killers EP in 2019 and at the end of last year shared the latest in his New Poems series, Volume 4.</p> <p>Together they discuss their song-writing process, whether they are led by words or music, and the psychological effect of creativity.</p> <p>In the second half of the programme, Speech Debelle takes us through a playlist called Music Is Good Food, featuring tracks from Black Uhuru, Prince, Kelis, plus more.</p> <p>SAT 23:00 BBC News (w172z2r2jdvdl36) The latest five minute news bulletin from BBC World Service.</p> <p>SAT 23:06 The Newsroom (w172z2srvy78lb3) The world's Newsroom brings you global events as they happen</p> <p>SAT 23:20 Sports News (w172z1k5b49qmj7) BBC Sport brings you all the latest stories and results from around the world.</p> <p>SAT 23:30 BBC News Summary (w172z2rwz4g2ycl) The latest two minute news summary from BBC World Service.</p> <p>SAT 23:32 Tech Life (w3ct4tqk) This episode could have been an email</p> <p>From summarising video calls to making presentations in minutes, Microsoft is launching an AI copilot on some of its apps and Tech Life have been for a preview. But will it change how we work or present new challenges? We also speak to the tech entrepreneur, Miron Mironiuk, who is collaborating with Pope Francis to teach children tech skills. And we meet 21 year old Luke Farritor who has won \$40,000 unscrambling ancient texts that were left unreadable after the eruption of Mount Vesuvius.</p>	<p>Presenter: Shiona McCallum</p> <p>(Picture: a video call taking place on line Getty/Mayur Kakade)</p> <p>SUNDAY 29 OCTOBER 2023</p> <p>SUN 00:00 BBC News (w172z2r2jdvdpvb) The latest five minute news bulletin from BBC World Service.</p> <p>SUN 00:06 BBC OS Conversations (w3ct5b2h) [Repeat of broadcast at 09:06 on Saturday]</p> <p>SUN 00:30 BBC News Summary (w172z2rwz4g323q) The latest two minute news summary from BBC World Service.</p> <p>SUN 00:32 The Comb (w3ct5j09) When violence goes viral (Radio version)</p> <p>Ethiopians on social media have been dealing with a wave of violent and graphic content in recent years. Multiple conflicts have seen violent pictures and videos regularly shared online, often alongside threats, hate speech, or disinformation. For Moti, this hit close to home in a devastating way when his father was the target of a political killing, and pictures of his dead body were posted on social media. Rehobot also shares her experience of combating this online hate through fact-checking, but how exposing herself to so much violent content eventually impacted her mental health.</p> <p>This is a shortened radio version of this episode - to hear the full-length version, visit bbc.worldservice.com/thecomb</p> <p>SUN 00:50 Sporting Witness (w3ct4sjj) England win the Rugby World Cup</p> <p>In 2003, England beat Australia in Sydney to win the Rugby World Cup.</p> <p>The match was famous for England's fly-half, Jonny Wilkinson, kicking the winning points in the dying seconds.</p> <p>England's coach, Sir Clive Woodward, and Australia's captain, George Gregan, recount that night to Ben Henderson.</p> <p>(Photo: Sir Clive Woodward lifts the Rugby World Cup trophy. Israel moves into "second stage" of war

Phone and internet access is slowly returning into Gaza after a complete blackout for over a day. It comes as Israel intensified its bombardment of the territory and began a large ground operation involving tanks and troops. On Saturday, the Israeli Prime Minister Benjamin Netanyahu said his priorities in Gaza were to destroy Hamas and bring the hostages home.

Also in the programme: people are looting in the Mexican city of Acapulco following Hurricane Otis; and we speak to Taiwan's first Minister of Digital Affairs Audrey Tang.

Joining presenter Audrey Brown are Nemo Kim, a South Korean journalist, art critic and writer based in Seoul, and Dermot Hudson who is a professor at Loughborough University and expert in European politics and digital technologies.

My life as rock's first female roadie

As a teenager, Tana Douglas ran away from an abusive home to work as a roadie for rock bands like AC/DC, Status Quo, The Who and Elton John in an era when music concerts went from scruffy pubs to million dollar arena productions. Despite the gruelling schedule and hard physical work Tana loved the job, even though she was the only woman doing it. But the pressures she faced in this all-male environment led her to hide a monumental secret in order to fit in. Her dedication to keeping the show on the road - and her apparent rock and roll lifestyle - was eventually turned against her during a bitter family feud in which the stakes could hardly have been higher. (First broadcast 14 Sep 2022)

The overlooked mathematicians of history

Conventional histories of mathematics are dominated by well-known names like Pythagoras, Leibniz or Newton. But to concentrate solely on figures from Europe gives us only a patchwork understanding of the rich and varied history of mathematical achievement around the world.

Tim Harford speaks to Dr Kate Kitagawa, co-author of The Secret Lives of Numbers, to explore the long history of mathematical advances and innovation across civilisations and centuries, from the female mathematician at court in imperial China to the pioneers in the mathematical powerhouses of the Middle East in the first millennium AD.

The electric car race

Countries around the world are racing to achieve targets on the ban of new petrol and diesel cars - but they are hitting stumbling blocks, meaning some are pulling back on their commitments.

Although global sales of electric cars are rising, some countries are struggling to persuade drivers to make the switch. Reasons given include insufficient or unsuitable charging points, and the price tag: criticism is often put to governments that the shift to electric cars is hardest for the least well off.

In this edition of Business Daily, Rick Kelsey looks at one country which is well ahead of the rest: Norway. The country's aim is that all new car sales in 2025 will be of electric vehicles - a plan being supported by financial incentives and policy changes.

He also speaks to business leaders in the car industry, including a man known as "the Godfather of EV", to find out what's needed if countries are to phase out internal combustion engines.

The billion dollar bid to stop oil drilling in the Amazon

In 2010, a \$3.6billion fund was launched to stop oil drilling in the most biodiverse place on the planet: the Yasuni national park in Ecuador.

The Yasuni covers 10,000 square kilometres of Amazon rainforest and is home to thousands of species of plants and animals but underneath the soil lies another important resource - 20% of Ecuador's oil reserves.

It was feared that any drilling would cause pollution, deforestation and soil erosion so in a pioneering deal - known as the Yasuni ITT initiative - rich nations were asked to pay Ecuador not to remove the oil.

Chief negotiator Ivonne A-Baki was put in charge of raising funds from around the globe but securing money was not an easy task, as she tells Jane Wilkinson.

Gezi Park protests and MAD hijack

Max Pearson presents a collection of this week's Witness History episodes from the BBC World Service.

We hear from activist and actor Memet Ali Aalborg on how his social media post contributed to the civil unrest following the Gezi Park protests in Turkey in 2013.

Our guest, Selin Girit who covers Turkey for BBC World Service, talks to us about Turkey's important position between Europe and Asia. We also learn about the fighting in 1980 between the left and right-wing groups that led to Turkey's military taking control of the country. Vice Admiral Isik Biren, who was an official in the defence ministry, and a former student activist, Murat Celikkan recount their different memories of the coup.

We hear more about Turkey's geographic connection from Harvey Binnie who was involved with the design of the first Bosphorus suspension bridge in 1973. And from Zimbabwe, economist Professor Gift Mugano, on how the country's annual inflation rate was 89.7 sextillion percent in 2008. And finally the story of how a Nigerian Airways flight from Lagos to Abuja was hijacked by four teenagers calling themselves the Movement for the Advancement of Democracy (MAD). Obed Taseobi was a passenger on that flight in 1993.

Lessons of an Afghan girl disguised as a boy for ten years

Nilofar was living under the Taliban in Kunduz in northern Afghanistan. When she was four years old she was slapped to the ground for not wearing a headscarf. Her father's response was drastic, he cut off her hair and said that from that day on Nilofar would be a boy. For ten years she had the freedom of her brothers, hanging out with friends, riding bikes, playing judo but when she hit puberty she had to learn to become a girl again. It wasn't easy. With such a unique perspective on gender Nilofar was always destined to challenge the boundaries of Afghan society.

Israeli forces expand operation in Gaza

Israeli forces have been expanding their operation in the north of the Gaza Strip, with tanks spotted on a key road, while continuing to tell hospitals to evacuate. And violence escalates in the West Bank - as human rights groups say the Israeli state is trying to force Palestinian communities out.

Also in the programme: Newshour's Nuala McGovern is in the Taiwanese capital Taipei, where she talks to people about the island's future relationship with China, and hears from a political strategist about Taiwan's policy of 'strategic ambiguity'.

She tells Professor Jim Al-Khalili that she has always found herself ahead of the curve. When she began in oncology, the study of cancer, the common treatment was chemotherapy which attacked all the cells in an affected area. Her first studies into cancer treatments were looking at how certain therapies could focus in on the cancerous cells and move away from what she describes as the 'sledgehammer' of traditional chemotherapy. It was an early step in what became known as targeted cancer therapies, and it set Bahija on course for a career dedicated to developing innovative drugs to improve cancer patients' lives. Through a deep understanding of the science and a resolute commitment to putting treatments in the hands of people who need them, she has produced astonishing results.</p> <p>MON 21:00 BBC News (w172z2r4brb6hh2) The latest five minute news bulletin from BBC World Service.</p> <p>MON 21:06 Newshour (w172z09qw2j34qh) Gaza: Netanyahu rejects calls for a ceasefire</p> <p>Speaking at a news conference to foreign journalists, Israel's prime minister said the fighting would not stop until Hamas was dismantled. Experts predict that Africa could be home to 40% of humanity by the end of this century, and that the twenty fastest-growing cities in the world will be in sub-Saharan Africa. Will the continent have the potential for a brilliant urban future – or for an increasingly bleak one? Much will depend, in large part, on how it's managed. How can already highly pressurised African cities provide better opportunities for all their inhabitants?</p> <p>Mike Wooldridge considers the future - and nothing is more pressing than the combination of this rapid urbanisation and accelerating climate change. In many cities, climate change will only add to the challenges. How the continent manages this, will not only affect the daily lives of the millions of Africans, but shape everything from migration and global economic prosperity to the future of the African nation state and the prospects for limiting climate crisis.</p> <p>Presenter: Mike Wooldridge Producer: Ruth Evans A Ruth Evans production for BBC World Service</p> <p>TUE 03:00 BBC News (w172z2r4brb76yv) The latest five minute news bulletin from BBC World Service.</p> <p>TUE 03:06 Outlook (w3ct4qgr)</p>

WED 04:32 The Bomb (w3ct67bs)

The Einstein letter

Christopher Nolan's Hollywood film 'Oppenheimer' tells the story of the father of the atomic bomb. And one of the other key players in the creation of the bomb was the scientist Leo Szilard – he was instrumental to both the creation of the bomb, and later, the fight to stop it being used. The writer Emily Strasser's family was involved too, and she tells the story of the chain reaction onwards from the splitting of the atom.

A vital message must be delivered to US President Franklin D. Roosevelt. Fearing the Nazis are on the verge of creating the first nuclear bomb, Leo Szilard needs to convince the US Government to take the threat seriously. In his hour of need, he reaches out to an old friend, Albert Einstein.

WED 04:50 Witness History (w3ct4xjn)

Japan surrenders in China

In the autumn of 1945, World War II surrender ceremonies took place across the Japanese Empire.

The one in China was held at the Forbidden City in Beijing bringing an end to eight years of occupation. Thousands of people watched the incredible moment Japanese generals handed over their swords. The United States, China, Russia and the United Kingdom were all represented.

John Stanfield, now 103, is the last surviving British person who was there. He recalls to Josephine McDermott how he signed the surrender declaration documents on behalf of the British.

Communications networks cut in Gaza

As Israel continues its military response to the October 7th Hamas attack, cutting telecommunications systems this morning, we have a BBC interview with the Israeli president about the public mood.

Meanwhile, as the ongoing bombardment contributes to a growing humanitarian crisis in Gaza, the Rafah border crossing with Egypt could be opened to seriously wounded Palestinians seeking medical care.

Also, amidst ongoing conflicts across the world, we hear about a new study which warns that severe ecological threats could increase the risk of war if environmental action is not taken.

The Crypto King and the journalist

Sam Bankman-Fried, the American crypto entrepreneur who went from billionaire to bankrupt, is on trial in New York for fraud.

The 31-year-old who founded the cryptocurrency exchange FTX is accused of lying to investors and lenders.

He has denied those charges, and instead says he was acting in good faith but made mistakes. He says he never set out to defraud anyone.

In the coming days, 12 jurors will decide his fate - he could face a life sentence in prison if convicted.

Vivienne Nunis speaks to financial journalist Michael Lewis, who spent hundreds of hours with Sam Bankman-Fried for his new book Going Infinite.

WED 08:50 Witness History (w3ct4xk8)

Inventing the black box

On 23 March 1962, a prototype of the first cockpit flight recorder, the black box, was tested in Australia.

In the early 1950s, fuel scientist David Warren, who worked in the Australian government's aeronautical research laboratories, attended a talk about the reasons for a recent plane crash.

David thought that if only he could speak to a survivor, he'd have a much better idea of what caused the crash and could prevent future ones.

This led him to develop a recorder that would collect vital information of the last few hours before a plane goes down.

Today the modern equivalent of the black box is compulsory equipment on passenger planes all over the world.

In 2015, David's children, Jenny and Peter Warren, and a former colleague, Bill Schofield, spoke with Catherine Davis about how his idea changed air travel forever.

The 'five careers' of Bettye Lavette

Bettye Lavette was a 16-year-old growing up in Detroit when she had her first hit, My Man, in 1962. In 2009 she performed at President Obama's inauguration celebration and called it "the greatest day of my life." But the path from that first hit to the recognition she now enjoys around the world has not been smooth. She talks to Emily Webb about how she spent the intervening years "working, not waiting," and kept her faith that the phone would always ring.

This interview was first broadcast on 30th September 2020.

Presenter: Emily Webb
Producer: Laura Thomas

Taught to fear: Corporal punishment in the classroom

In Kenya, corporal punishment in schools has been banned for over twenty years, yet young students are being beaten by their teachers on a daily basis, and the consequences can be fatal. In the last five years alone, it's believed more than 20 children have died at the hands of their teachers.

In this week's Assignment, BBC Africa Eye's Tom Odula, whose own school years were marked by brutal and degrading treatment at the hands of teachers, goes on a journey to investigate the extent of the problem and what can be done to address it.

He speaks to young victims who bear the scars of vicious beatings, to families who are seeking justice for their children who have reportedly been beaten, one of whom died - and to teachers who have turned their back on the cane and are now trying to spread the message that violence in the classroom is wrong.

Through all of this, Tom asks the question, why is this happening, and what is being done to protect the most innocent in our society?

Cooking in extreme places

Wherever humans go, whatever we do, we need to eat.

In this programme, we meet the people cooking at the extremes.

We hear about the chefs serving up three-course meals on Africa's highest peak; the elaborate puddings created on stormy seas with a cruise ship pastry chef; the art of cramming enough food to feed 100 hungry sailors on board a nuclear submarine with a US Navy submarine culinary specialist, and tapas nights in the Antarctic with the chef at Rothera research station.

Israeli military says its ground forces at gates of Gaza City

The conflict in Gaza continues to deliver death and destruction, but there has been a small step forward with some injured Palestinians and foreign nationals being permitted to leave the territory via Egypt's Rafah crossing.

As Israel's military response to the attack by Hamas ramps up, and the death toll continues to mount in Gaza, diplomatic relations are being tested: Jordan has announced that it will withdraw its Ambassador to Israel - we speak to a former Jordanian foreign minister.

And the dangers of artificial intelligence, we hear from one of the pioneers in the field who now has serious concerns.

Israel-Gaza war: Injured Palestinians and foreign nationals enter Egypt

US President Joe Biden has hailed the partial opening of Rafah crossing from Gaza into Egypt as a diplomatic breakthrough, though the numbers of foreign nationals and injured Palestinians that have been able to cross so far is limited.

In Israel the fate of the hostages is a major concern - we hear from one father whose two daughters were kidnapped by Hamas on 7th October.

The UK is hosting a major international conference looking at the potential dangers of artificial intelligence - we hear from a former hacker who is attending the event.

US praises opening of Rafah to allow limited crossings from Gaza to Egypt

We'll have the latest from Gaza where we have seen people leave the besieged area for the first time since the Hamas attack on Israel - President Joe Biden has hailed the limited movement of foreign nationals and injured Palestinians as a diplomatic success.

The US chief diplomat Antony Blinken is due to return to the region on Friday as diplomatic activity continues - we speak to

a British member of parliament for more on the international reaction to the crisis.

And in business we'll hear about a compensation case win for Australia's aboriginal population.

What is the Human Cell Atlas?

The Human Cell Atlas is a project that has 3000 researchers in over 94 countries working to collect samples of every single cell in the human body.

The idea is that an interactive map of the body will be created. It will be a reference for what every kind of normal human cell should look like. But that will also vary depending on who you are and where you live.

It will give doctors a tool to measure illness and disease and make diagnosis and treatment much quicker.

The database will enable any doctor, anywhere in the world, with the right kind of interface, to access the information.

It could be ground-breaking for the treatment of disease and the democratisation of healthcare.

Contributors:

Dr Aviv Regev, one of the co-chairs of the Human Cell Atlas
Dr Sarah Teichmann from the Wellcome Sanger Institute and the University of Cambridge
Dr Piero Carninci, Geneticist, Transcriptome Technology and RIKEN Centre

Why is the French wine industry struggling?

The region of Bordeaux in the south-west of France is perhaps the most famous wine-producing area in the world.

But it's struggling. While the prestigious, most expensive wines - Saint-Émilion, Pomerols and Margaux are selling well, others are not.

For the producers of the 850 million bottles of the region's famous red wine, it's a difficult time due to a major decline in consumption.

We look at the reasons for this, the impact it's having, and what winemakers are doing to help protect their livelihoods.

Che Guevara's daughter: A Cuban doctor in Angola

In 1986 Dr Aleida Guevara, the daughter of revolutionary icon Che Guevara, went to Angola to work as a paediatrician.

Dr Aleida was one of a number of medics Fidel Castro's Cuban government sent to their fellow communist country in southern Africa as it emerged from Portuguese colonialism into civil war.

Marcia Veiga hears how Dr Aleida treated children with cholera in a hospital in the Angolan capital Luanda.

Dr Aleida also reveals how, during downtime from working as Cuba's minister of industries, her tired father played with her by carrying her on his back as if he were a horse.

The music for this programme is from Dadifox and Receba.

THU 20:32 Science In Action (w3ct4sd5)

Climate emergency

Category 5 hurricane Otis, which devastated Acapulco, was supercharged by global warming; hurricane expert Kerry Emanuel tells Science in Action.

Also, Brazilian ecologist Erika Berenguer has witnessed the destruction caused by the prolonged drought in Amazonia, where the rivers are drying up and the forest is burning.

And, climate scientists now say there is less time than previously thought to avoid further dangerous warming. Two climate scientists, Chris Smith and Norman Loeb, break the bad news - that the climate is more sensitive to greenhouse gases than forecasts have used.

Finding Falun Gong

It's been more than two decades since the Chinese government launched a crackdown on Falun Gong. The spiritual group claims practitioners face mass arrest, torture and are murdered by the state for their organs. The movement is seen as the most organised opposition group to the Chinese government. China calls Falun Gong an evil cult determined to bring down the Chinese Communist Party. Practitioners say the movement is non-political but critics claim the spiritual group is building an international fake news empire, are staunch supporters of Donald Trump and are sympathetic to far-right politicians. Banned in mainland China, Falun Gong believers once practiced and protested openly in Hong Kong. But since the introduction of a draconian national security law Falun Gong's presence in the territory has all but vanished. The BBC's Danny Vincent travels to the self-ruled island of Taiwan to talk to

practitioners about their faith, persecution, the Chinese Communist Party and the future of Falun Gong.

Iran has warned Israel that the Middle East could spiral out of control if it does not stop strikes on Gaza. It says the US is also "to blame" for providing military support to Israel. Top US officials are warning the conflict could spread. US Secretary of State Antony Blinken has talked about a "likelihood of escalation" from Iranian proxies, such as Hezbollah or Hamas, and said the US was "taking every measure" to ensure it can defend "Israelis and US citizens. How high is the risk of the conflict escalating across the region? What are countries doing to prevent an escalation? Is there a real danger of a general war in the Middle East that could pull in Iran, the US and even Saudi Arabia?</p> <p>Shaun Ley is joined by:</p> <p>Aaron David Miller, Senior Fellow at the Carnegie Endowment for International Peace Mirette Mabrouk , Senior Fellow and Director of the Egypt and the Horn of Africa program at the Middle East Institute Sanam Vakil, Director of the Middle East and North Africa programme at Chatham House</p> <p>Also featuring:</p> <p>Dr Seyed Mohammed Marandi, professor of English literature and Orientalism at the University of Tehran</p> <p>Produced by Max Horberry and Ellen Otzen</p> <p>(Photo: An Israeli artillery unit fires during a military drill in the annexed Golan Heights - 02 Nov 2023 AYAL MARGOLIN/EPA-EFE/REX/Shutterstock)</p> <p>FRI 11:00 BBC News (w172z2r4brbjwn5) The latest five minute news bulletin from BBC World Service.</p> <p>FRI 11:06 The Newsroom (w172z2tn40b369c) The world's Newsroom brings you global events as they happen</p> <p>FRI 11:30 BBC News Summary (w172z2rysgy77xk) The latest two minute news summary from BBC World Service.</p> <p>FRI 11:32 Heart and Soul (w3ct4pkb) [Repeat of broadcast at 04:32 today]</p> <p>FRI 12:00 BBC News (w172z2r4brbk0d9) The latest five minute news bulletin from BBC World Service.</p> <p>FRI 12:06 The Fifth Floor (w3ct4v0t)</p>	<p>What's happening in Ukraine?</p> <p>Presented by Irena Taranyuk</p> <p>The intense focus of the world's media on events in the Middle East has taken attention away from the war in Ukraine. We ask what's the latest on the war, and what important stories are being reported from the region? Answers from Diana Kuryshko of BBC Ukrainian and Vitaliy Shevchenko, Russia editor at BBC Monitoring and co-presenter of Ukrainecast.</p> <p>Factories versus fishermen: the story of Rempang Island A small Indonesian island off Sumatra has been in the news because of a threat to evict local residents to make way for industrial development. Villagers on Rempang Island mostly make a living from fishing, and they have been protesting against the plan. BBC Indonesian's Astudestra Ajengrastri went to Rempang Island to investigate.</p> <p>Pakistan bump shaming Pictures of the cute babies of celebrities are popular on social media in Pakistan. But it seems Pakistanis are not so keen on images of the previous stage: pregnancy. Women have been trolled or banned from the screen for proudly showing their fully-covered baby bumps. BBC Urdu's Shumaila Jabeen has been asking why this is so shocking.</p> <p>Pre-hispanic Latin America Gender equality, tolerance of same-sex relations, no extreme poverty and sustainable lifestyles: these are all areas in which indigenous cultures in Latin America were ahead of their time, according to research done by BBC Mundo. It's a story which really caught the imagination of the Spanish-speaking audience - reporter Jose Carlos Cueto tells us more.</p> <p>(Photo: A resident is seen after shelling in the Ukrainian frontline city of Avdiivka on October 17, 2023. Palestinian losses

The fighting and funerals in the Israel and Hamas war are constant. Thousands have been killed.

The number of fatalities don't tell the real stories though. In recent days, the OS team has been reaching out to people on both sides who have lost loved ones in the war; inviting them to tell the stories of those killed.

Next week's programme will feature Israeli families. This edition, hosted by James Reynolds, is a conversation with two Palestinians who now live in Scotland and Turkey.

Yousef Almqayyad in Istanbul, had to have a heartbreaking discussion with his seven-year-old daughter about the deaths in his family.

"Your grandfather, your grandmother, your uncles and aunts and your cousins, right now are in heaven, in a good place," he said. "Better than Gaza, better than Turkey, better than any place in this world. I told her they are waiting for us."

Dr Ibrahim Khadra also shares his final conversation with a member of his family in Gaza, who said: "If we'll survive, we'll pray to God and if I'll die just pray for me."

"It was our last call," said Dr Khadra.

FRI 20:32 CrowdScience (w3ct4y4x)

How does food affect our mood?

"You are what you eat" is a well-known saying. But is it really true? That's what we explore in this week's CrowdScience thanks to a question from listener Claire from Australia.

We each have trillions of tiny microbes and bacteria inside our bodies, living in our mouths, skin, ears and even in our eyes. Each community of microbes and bacteria is known as a microbiome. The most populous of these is in our gut, with hundreds of trillions of organisms and bacteria helping digest the food we eat.

Our gut microbiome is affected by lots of things but mainly by our diet. With our gut microbiome forming such a massive part of our insides, people have long suspected that what we eat impacts how we feel.

Presenter Caroline Steel investigates. She speaks to a professor of Psychiatry, Jane Foster, to find out how interconnected our microbiome and our brain really are. Professor Foster also explains the different ways in which our microbiome and brain communicate.

Do we really know what role diet plays in mental health? Consultant psychiatrist Professor David Veale provides more detail. And at a café with a rather interesting menu, Caroline samples some of the food available as occupational therapist Joel Oliver explains how important food can be as part of mental health treatment.

This begs the question: if our microbiome really does influence our mental health, can we harness the power of microbes to potentially find new treatments to help our mental health? Dr Najaf Amin tells us about her research identifying the link between specific microbes and depression.
